PROFESSIONAL SUMMARY

Dedicated and results-driven Mobile Application Developer with over 2.5 years of professional experience specializing in Android Native (Kotlin) and Flutter (Dart) application development. Proven track record of developing, optimizing, and maintaining production-ready mobile applications serving large-scale user bases. Experienced in Clean Architecture, MVVM design patterns, REST API integration, and robust state management (Riverpod, Provider). Adept at working in cross-functional Agile Scrum teams to deliver high-quality mobile products and improve application stability.

TECHNICAL SKILLS

- **Programming Languages:** Kotlin, Dart, Java, SQL
- **Mobile Development:** Android SDK, Jetpack Compose, Flutter SDK, XML, Responsive UI
- **Architecture & Principles:** Clean Architecture, MVVM, SOLID Principles, Repository Pattern
- **State Management:** Riverpod, Provider, StateFlow, LiveData
- **Networking & API Integration:** REST APIs, Dio, Retrofit, JSON Parsing, OkHttp
- **Database & Storage:** Room Database, SQLite, Firebase Firestore, SharedPreferences, DataStore, Flutter Secure Storage
- **Firebase Services:** Firebase Authentication, Firebase Cloud Messaging (FCM), Firebase Analytics, Firebase Crashlytics
- **Tools & Platforms:** Android Studio, IntelliJ IDEA, VS Code, Postman, Gradle, Git, GitHub
- **Methodologies:** Agile, Scrum, Peer Code Reviews, Sprint Planning, Task Estimation, Cross-functional Collaboration

PROFESSIONAL EXPERIENCE

Junior Software Engineer

Nascenia Limited | Dhaka, Bangladesh
September 2023 – Present

- Develop and maintain high-performance, responsive Flutter and Android Native applications in production environments, collaborating within a 4-member mobile team.
- Support large-scale telecom applications **My Robi** and **My Airtel BD** (millions of users) by updating existing features with new UI designs and fixing critical bugs to enhance user satisfaction and application stability.
- Developed core modules and implemented Clean Architecture with Riverpod for **Shojja Hospital** (a hospital ecosystem application) in Flutter, ensuring separation of concerns and modular code design.
- Integrate secure OTP-based user authentication using backend REST APIs and localized resources for multi-language support in Flutter applications.
- Implement real-time push notifications using Firebase Cloud Messaging (FCM) to drive user engagement and deliver timely updates.
- Developed **Weighing Scale App** (Android Native in Kotlin), implementing reliable real-time Bluetooth communication with external weighing hardware to stream, process, and display weight measurements.
- Optimize state management and network calls using Provider and Retrofit in **CZM Mobile App** (Zakat management) and **Biyeta** (matchmaking app), improving loading speed and screen transitions.
- Actively participate in Agile ceremonies, including sprint planning, daily stand-ups, task estimations, and sprint reviews, while performing peer code reviews to enforce code quality standards.

NOTABLE PROJECTS

My Robi | Kotlin, XML, MVVM, REST API, Retrofit

- **Problem:** The leading telecom operator needed to update legacy self-care features with new UI layouts, optimize API integrations, and resolve production bugs for millions of active users.
- **Solution & Architecture:** Refactored frontend modules using MVVM architecture with native Kotlin and XML layouts.
- **My Responsibilities:** Developed and updated existing feature frontends, resolved layout rendering bugs, and integrated Retrofit API endpoints.
- **Technical Challenge:** App lag and memory overhead due to deeply nested layouts, resolved by flattening view hierarchies with ConstraintLayout.

My Airtel BD | Kotlin, XML, MVVM, REST API, Retrofit

- **Problem:** Subscribers needed a responsive interface for real-time account tracking, bundle purchases, and promotional campaign views.
- **Solution & Architecture:** Designed and implemented user-facing features using native Kotlin, XML, and MVVM architecture.
- **My Responsibilities:** Created promotional campaign views, refactored balance check bindings, and resolved cross-device rendering bugs.
- **Technical Challenge:** UI rendering bottlenecks on lower-end devices, resolved by optimizing view-binding references and layout hierarchies.

Shojja Hospital | Flutter, Dart, Riverpod, Firebase FCM, REST API

- **Problem:** The client required a secure, multi-tenant mobile ecosystem for hospital operations that supported localized user interfaces and reliable messaging.
- **Solution & Architecture:** Developed the application using Clean Architecture (Data, Domain, Presentation layers) and Riverpod state management.
- **My Responsibilities:** Built the core authentication module (OTP verification via REST API), integrated localized strings, and set up FCM push notifications.
- **Technical Challenge:** Managing screen state and asynchronous data synchronization during unstable network conditions, resolved by implementing Dio interceptors and Riverpod state caching.

Weighing Scale App | Android Native, Kotlin, Bluetooth, XML

- **Problem:** Industrial operators needed a robust interface to capture and record real-time weight measurements from weighing scale hardware via wireless communication.
- **Solution:** Built a native Android utility that connects to weighing hardware and converts raw serial data streams into human-readable measurements.
- **My Responsibilities:** Managed the Bluetooth communication lifecycle, handled asynchronous input streams, and designed an operator-friendly UI.
- **Technical Challenge:** Handling intermittent Bluetooth disconnections without crashing the app, resolved by building a persistent background connection service with auto-reconnect logic.

CZM Mobile App & Biyeta | Flutter, Dart, Provider, Retrofit

- **Problem:** Zakat fund management and matrimonial matchmaking required smooth API integrations and reactive UI components to manage dynamic data loads.
- **Solution:** Maintained and optimized existing modules using Provider for lightweight state management and Retrofit/Dio for structured networking.
- **My Responsibilities:** UI updates, fixing performance bugs, and integrating new REST API endpoints.
- **Technical Challenge:** Rendering complex lists and nested profile structures efficiently, resolved by optimizing asset loading and implementing lazy list rendering.

EDUCATION

Bachelor of Science (B.Sc.) in Computer Science & Engineering

Northern University Bangladesh | Dhaka, Bangladesh
2024 – Present (Expected Graduation: 2027)

Diploma in Engineering in Computer Science Technology

Rajshahi Polytechnic Institute | Rajshahi, Bangladesh
2018 – 2022

- **CGPA:** 3.54 / 4.00

CERTIFICATIONS & TRAINING

- **Professional Certificate in Android App Development** | Creative IT Institute (Dhaka, Bangladesh)
Duration: 3 Months (Completed December 2022)
